Partner Agreements

1. **Definition:** A **Decision Tree** is a model for classification and regression tasks. It consists of a root node, internal nodes, and leaf nodes. The root node branches into internal nodes, which further branch into leaf nodes. The leaf nodes represent the final classification or regression output.

[illegible]

Diagram illustrating the structure of a DNA sequence. The sequence is represented by a horizontal bar divided into segments. The segments are labeled with letters: D, r, d, r. The segments are color-coded: D is blue, r is green, d is red, and r is green. The segments are arranged in a sequence: D, r, d, r. The segments are connected by lines, indicating a continuous sequence.
