Partner Agreements

1. **Definition:** A **Decision Tree** is a model for classification and regression tasks. It consists of a root node, internal nodes, and leaf nodes. The root node branches into internal nodes, which further branch into leaf nodes. The leaf nodes represent the final classification or regression output.

4.

$\frac{1}{n} \sum_{i=1}^n x_i = \bar{x}$

Diagram illustrating the structure of a DNA sequence. The sequence is represented by a horizontal bar divided into segments. The segments are labeled with letters: D, r, d, r. The segments are color-coded: D is blue, r is green, d is red, and r is green. The segments are arranged in a sequence: D, r, d, r. The segments are connected by lines, indicating a continuous sequence.
